Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/613,612

Applicant(s)

STEADMAN ET AL.

Examiner

Ian J. Lobo

Art Unit

3662

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-52 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-52 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. ____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date ____.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date ____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: ____.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-8, 13, 22-28, 34-41 and 46-52 are rejected under 35 U.S.C. 102(b) as being anticipated by the patent to Brown et al ('885).

The patent to Brown et al discloses a method and system that includes acquiring signals from one or more surveillance systems and distinguishing a threat from said signals (col. 4, lines 1-16), communicating a cue signal (26) to a countermeasure system (10) having a countermeasure (76, 78), and deploying the countermeasure. Claims 1 and 34 so anticipated. In as much as the system (10) of Brown et al includes a processor (30), it is inherent that the processor includes computer readable instructions that anticipate the steps of claim 26.

Claim 2 is anticipated by col. 4, lines 3-4.

Claims 3-5, 27, 28 and 35-40 are anticipated by col. 3, lines 56-60.

Claim 6 is anticipated by col. 3, lines 9-20.

Claim 13 is anticipated by col. 5, lines 8-11.

Claims 7-8 and 22-25 are anticipated by col. 1, lines 16-24 and Fig. 2.

Claims 41, 46 and 48 anticipated by processor 30.

Art Unit: 3662

Claims 49 and 50 are anticipated by col. 6, lines 7-11.

Claims 51 and 52 are anticipated by col. 1, line 17 and col. 6, lines 7-11.

3. Claims 1-5, 22, 26, 27 and 34 are rejected under 35 U.S.C. 102(b) as being anticipated by the patent to O'Neill ('897).

The patent to O'Neill discloses a method and system that includes acquiring signals from one or more surveillance systems and distinguishing a threat from said signals (col. 4, lines 8-36), communicating a cue signal (80) to a countermeasure system (64) having a countermeasure and deploying the countermeasure (col. 4, lines 6-7). Claims 1 and 34 are so anticipated. In as much as the system (20) of Brown et al includes a processor (70), it is inherent that the processor includes computer readable instructions that anticipate the steps of claim 26.

Claim 2 is anticipated by elements 30 and 32 in Fig. 1.

Claims 3-5, 22 and 27 are anticipated by col. 1, lines 5-34.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 9-12 and 14-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over the patent to Brown et al ('885) when taken in view of White et al ('134).

Claims 9-12 and 14-18 are specific to the signal processing steps of the countermeasure processor. Brown et al does not discuss the details of the signal processing system but does suggest the use of acoustic signals (col. 5, line 11).

The patent to White et al discloses that the use of discrete Fourier transformation (DFT), fast Fourier transformation (FFT), digital filtering using infinite impulse response filters and finite impulse response filters are well known in the acoustic signal processing art. In view of the suggested use of acoustic signals in the countermeasure processor system of Brown et al, it would have been obvious, in light of the teachings of White et al, to utilize the processing and filtering techniques of White et al in the acoustic system of Brown et al so as to better distinguish a threat in the acoustic signals. Note that digital filters cover almost all window-based FIR and IIR filters, which include averaging, exponential, Butterworth, Chebyshey, Kaiser window, and all other windowing functions such as Hanning, Hamming, and Blackman.

6. Claims 19-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brown et al ('885) when taken in view of Duckworth et al (141).

The difference between claims 19-21 and the Brown et al system is the claims specify using time-difference calculations for calculating the position and/or bearing of a source. As aforementioned in the previous paragraph, Brown et al does not discuss the

Art Unit: 3662

specifics of the processing system, especially the acoustic system suggested.

However, as evidenced by the patent to Duckworth et al, a skilled artisan would readily be able to ascertain positional and bearing information from the time-difference calculations of the acoustic signals, such that it would be obvious to a skilled artisan to utilize time-difference calculations for ascertaining the location of a missile of Brown et al.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ian J. Lobo whose telephone number is (703) 306-4161. The examiner can normally be reached on Monday - Friday, 6:30 - 3:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas H. Tarcza can be reached on (703) 306-4171. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
